Acceptability of security shall be determined in the sole discretion of the Company.

10.4 The existence of a dispute or query relating to part only of any invoice shall not relieve the customer of his obligation to make payment in respect of that part of any invoice which is not the subject or any dispute or query and accordingly the provisions of condition 10.1 hereof shall apply to such part of any invoice in respect of which there is no dispute or query.

The Company is however liable without unnecessary delay and in any case not later than 30 days after becoming aware of any such occurrence to notify the customer whether or not the contract remains valid and if so the approximate date on which it is expected that delivery may be effected or in whether the contract has been cancelled either wholly or in part and if cancelled part then the extent to which it has been cancelled. Warranty

1. Where permitted by law, all hand tools in the catalogue are offered with a lifetime warranty - a warranty against material and manufacturing defects for the normal lifetime of the tool in question. 'Lifetime' is defined as the period of time a tool can be expected to last under normal use and conditions.

2. SNA Europe's range of power tools, pneumatic tools and measuring tools are excluded from point 1 and each has a separate warranty card supplied with the product covering the specific warranty conditions. Products are designed and manufactured for professional use. Generally the warranty period is one year (12 months) for professional use and two years (24 months) for private use. The warranty period starts on the purchase date. This date may be verified with the invoice or any other document of equivalent legal validity.

3. Defective products will be repaired, replaced or substituted. SNA Europe does not cover transit costs for repaired, replaced or substituted products.

4. Any product that has been incorrectly used and/ or maintained or that is worn from improper use or that has suffered unauthorized modifications is not covered by this warranty.

5. A warranty claim must be submitted within the warranty period. This requires the submission or shipment of the complete tool in question with verification of sale documentation, which must validate the purchase date and the product designation, to the retailer or distributor.

6. Replacement or repair of the product will be carried out as quickly as possible. At the reception of the replaced or repaired product the customer is asked to validate conformity. Replacements and repairs provided under the warranty do not lengthen or renew the warranty period for the tool.
