

**CUT DOWN THE
HARD WORK**

CHOOSE THE LIGHTEST AND SHARPEST AXES

CHOPPING AXES

HATCHET COMPOSITE HANDLE

Bahco chopping axes come with slim and super sharp blade which is designed to cut cross-way through the fibers of the wood. The fiberglass handle are especially light, durable and robust. Using a chopping axe properly consists of cutting a horizontal log with many fast, downward strokes. Pick the right size according to the work to perform.

SPLITTING AXES

SPLITTING AXE COMPOSITE HANDLE

Splitting axes are used to cut logs situated in a vertical position with one downward stroke. The purpose is to cut along the grain of wood. The special head geometry of the Bahco splitting axes have been designed for forcing the wood fibers apart like a wedge and avoid to get stuck in the wood easily. The long handles facilitate a good swing speed which helps the splitting action. Pick the right size according to the work to perform and personal physical strength.
